

SKU: CORT-JF-60

CORTADORA FO UN PASO

Description

JF-60 fiber optic cutting one-step knife is a tool for precise cutting of optical fibers, which is widely used in the fields of optical fiber communication, optical fiber sensing, etc. Its main feature is that the fiber can be cut in one operation, ensuring that the cut surface is flat and smooth, and reducing loss.

**One-step
fiber cleaving**

**Sturdy
alloy body**

**Super long
life blade**

**Cleaved
angle $\leq 0.5^\circ$**

**High-quality
slide rail**

Applicable to all kinds of optical fibers from 250 μ m to 3.0mm

Tungsten steel blade wear resistance, high hardness

Silicone pressure pad, better fixed fiber

Large capacity waste fiber collection device

Specifications

Items	Specifications
Model	JF-60
Fiber type	0.25mm/0.9mm/3.0mm
Cladding diameter	125μm
Cleaved Length	5~20mm
Cleaved Angle	≤0.5°
Blade Life	48000cleaves
Weight	230g
Dimension	87(W)*74(D) *49(H)mm
Operation Condition	Temperature:-10~50°C/Humidity:0~95%RH (non-dew)
Storage Condition	Temperature:-40~80°C/Humidity:0~95%RH (non-dew)

Content	Quantity
Model	*1
Fiber Cleaver	*1
Adjusting Wrench	*1
Carrying Case User Manual	*1
